  Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Score

                    Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              DB

Sequence 2, Application US/09388089B
Patent No. US20020018782A1
GENERAL INFORMATION:
APPLICANT: Jackson, W.
APPLICANT: Jackson, W.
APPLICANT: HATXIS, A.
TITLE OF INVENTION: NEISSERIA MENINGITIDIS POLYPEPTIDE, NUCLEIC ACID
TITLE OF INVENTION: SEQUENCE AND USES THEREOF
FILE REFERENCE: 7969-083
CURRENT FILING DATE: 1999-08-31
CURRENT FILING DATE: 1999-08-31
NUMBER OF SEQ ID NOS: 20
SOFTWARE: Patentin Ver. 2.0
SEQ ID NO 2
LENGTH: 447
TYPE: PRT
ORGANISM: Neisseria spp.
                                                                                                                                                                                                                               CURRENT APPLICATION NUMBER: US/09/388,0898
CURRENT FILING DATE: 1999-08-31
NUMBER OF SEQ ID NOS: 20
SOFTWARE: Patentin Ver. 2.0
SEQ ID NO 12
LENGTH: 475
TYPE: PRT
RCANISM: Neisseria meningitidis
